Protection and recharging
of mobile devices in shared environments

Techly Professional offers the complete solution for recharging, storage and safekeeping of 80 tablets / notebooks / smartphones at the same time, ideal to store, protect and recharge multiple devices at the same time in environments such as schools, training rooms, conference rooms.
It is a safe place to store, sync and charge multiple mobile devices at the same time.
The closed and ventilated storage area keeps charging devices safe.

Safety: sturdy painted metal cabinet with blind front door in steel with closure with practical one-point handle with key. It is the ideal solution for storing up to 80 mobile devices in complete safety during charging or at the end of their use.

Versatility and practicality: thanks to its small size, it can hold and recharge up to 80 tablets / iPads, smartphones / iPhones or notebooks in very little space.

It has 4 shelves with 20 places each, for a total of 80 slots complete with cable management system.

Wide application: given the wide use of mobile devices such as notebooks, tablets, e-books, smartphones, ... in education, training, business, medicine ... this solution is essential to manage all these equipments in a practical and safe way.
