I-ALARM-KIT001

Smart technology, protect your home!

More protection

Protect your home and your family with
an effective and safe alarm system which uses sound,
visual alarms and telephone messages.
Techly offers an alarm system which works with wireless
technology, to guarantee timely reply in case of alarm,
anomaly or manumission of the components.

Easy installation

Easy installation is one of the most important strengths of
this alarm system: it works without running cables, **doesn't
require any structural interventions** of masonry, it requires
no preparation and is quickly installed. It is therefore an ideal
"do-it-yourself" unit. The kit includes all basic elements of a
complete and functioning alarm system: control panel, motion
detector, door/window sensor, remote controls and RFID tags.

Maximum flexibility

Being wireless it is extremely flexible
and therefore **easy to modify or expand at any time.**
It supports up to 99 wireless detectors, 10 remote controls
and 50 RFID tags, allowing the user to **personalize** their
system according to their individual needs. It supports
4 different zones to assign the wireless accessories
for optimum system management.

360° security

For increasing the protection of your home, you can
extend your system with water detectors, gas detectors,
and smoke detectors **to guarantee home security.**
Besides the SOS remote control you can send a help
request to preprogrammed telephone numbers.

Everything under control: anytime, anywhere

**You can completely manage your alarm system remotely
by your smartphone, by SMS or by APP. The alarm system
connects to the GMS mobile phone network and notifies
the user of intrusion by telephone call or SMS.**
