

In compliance with EU Directive WEEE this product is marked with this symbol. It means that used electrical and electronic products should not be mixed with general household waste. There is a separate collections system for these products in compliance with WEEE directive, otherwise contaminative and hazardous substances can pollute the environment.

With the CE sign, Techly® ensures that the product is conformed to the basic European standards and directives.

- The presenter supports PowerPoint, Keynote and Prezi by switching the functions of the page down/up buttons. By default, the page down/up buttons of the presenter function as the Up/Down Arrow on keyboard, which can support PowerPoint and Keynote. By pressing the page down/up buttons at the same time, the function will change to the left and right arrows on the keyboard for Prezi support. Doing it a second time changes the function to page up and down, which supports many other programs. Pressing them together a third time will revert back to the default setting.

#### INSTALLATION

- Install battery.

- Take out the mini USB receiver from the wireless presenter.

- Install the USB receiver.

The operation systems including Windows, Android and Linux will install the driver for the USB receiver automatically.

- Operate the wireless presenter. When a button is pressed, the blue led on the wireless presenter will flash.
- Turn off the wireless presenter.

#### FREQUENTLY ASKED QUESTIONS

##### 1. How to know the battery is out of power?

Turn on the power switch of the presenter, then press laser button to check if the laser can be turned on. If the laser cannot be turned on, usually it means the battery is out of power or the laser diode is broken and need replacement.

In other case, If the LED on the wireless presenter starts to flash slowly, it means the power is low and the battery needs to be replaced.

##### 2. Why does the laser pointer not work?

First, turn on the power switch. Second, check whether the wireless presenter is in low power or out of power. If the LED flashes slowly, it means the power is low and the battery needs to be replaced. If all the other buttons can work, only the laser pointer cannot work, the laser diode may need replacement. Third, check the place of anode and cathode of battery. Before putting a battery into the presenter, remember to remove the plastic cover of the battery.

##### 3. Why does the computer does not detect the device when the USB receiver plugs into the PC?

Please check whether the USB works or not. You can use a USB mouse or keyboard to test the USB port. If a USB mouse or keyboard works on the USB port and the USB receiver of the presenter doesn't work, it means the USB receiver of the presenter is broken or the USB drivers is not compatible with the USB receiver.

You can try another USB port of the same computer or USB ports of another computer to check whether the USB receiver of the presenter is good or not. If it works on other computer, it means the USB drivers of the computer are not compatible with the USB receiver. You need to back up your data and reinstall the OS.

##### 4. The laser is ok and the USB receiver can be detected by the computer, why does the presenter cannot control the computer?

The reason is the USB receiver doesn't save the presenter's address properly. You can use a CodeMatch software to let the USB receiver to save the presenter's address again.
